The PAAT program is funded by the U.S. Department of Education by a \$50,000 federal grant. The contents of this PAAT brochure are 100% funded by the federal grant and do not necessarily represent the official views of the funding agency. Upon request, this brochure is available in other formats, such as Braille, largeprint, on disk, or in Spanish.

Protection & Advocacy for Assistive Technology

Assistive Technology (AT)

What is AT?

Assistive technology is any item, piece of equipment, or product system, whether acquired commercially off the shelf, modified, or customized, that is used to increase, maintain, or improve functional capabilities of people with disabilities.

People with disabilities use AT devices and services to achieve greater independence and to enhance the quality of their lives. AT includes both devices and services.

AT devices include any item or piece of equipment used to maintain or improve the functional capabilities of a person with a disability, including devices like wheelchairs, computers, ramps, assistive listening devices, augmentative communication devices, and aids for daily living.

AT services are supports provided to people with disabilities or their caregivers to help them select, acquire, or use AT devices. Services also include functional evaluations, training on or demonstration of devices, and purchasing or leasing devices.

Protection & Advocacy for Assistive Technology (PAAT)

The PAAT program is authorized under Section 102 of the Assistive Technology Act of 1998 (Act). PAAT is a program administered by Disability Rights Arkansas.

If you are a person with a disability or know someone with a disability that has concerns, questions and/or has been denied AT devices, or AT services, please call Disability Rights Arkansas (DRA). DRA provides information, referral, advocacy and/or litigation services at no charge.
