Report Description: Name: [REDACTED] DOB: [REDACTED] Notified: Mylea White (AR/DHS) On 3/8/23 at approximately 1630, resident became escalated and began picking at several places on her arms. We were able to prevent most of her attempts by using the least invasive interventions possible to reduce risk to resident, as well as staff. We did this by physical blocking and verbal de-escalation. Resident was responsive to verbal de-escalation after some time. The only injuries were the reopening of a scab on residents' right wrist and a spot on her left arm. Minimal bleeding. Resident was assisted in cleaning off her arm, area was left open to air. Because of this, resident will remain on 1:1 observation until reassessed by clinical. Resident to be continued on 1:1 LOS for safety.
