Licensing Specialist viewed camera footage for incidents that happened on 11/3/2022 (■■■) and 11/4/2022 (■■■)

11/3/2022 – Licensing Specialist observed resident coming out of the gym and trying to climb the fence. Staff appeared to communicate with resident to come down off the fence. Resident kicked at staff but eventually got off the fence. It appeared that staff was communicating with the resident about his behavior of climbing the fence. Other staff members and a therapist were observed in view of the camera. Resident kicked at staff and was placed in a physical restraint. The ratio at that time of the restraint was 1:3 with a staff member observing. While in the physical restraint, resident was observed being physically aggressive toward staff by swinging, kicking, and head butting. When resident was released from the physical restraint, Licensing Specialist observed resident holding his wrist. Staff was not observed using inappropriate restraint techniques while the resident was in a physical restraint. Nursing tried to assess resident, but he refused treatment. He eventually allowed nursing to assess his wrist.
