Resident would re-escalate almost immediately after being released from physical hold requiring continued further intervention to maintain safety. Resident received IM medication as ordered by the provider to assist in emotional regulation. Resident was able to regulate emotions and maintain a calm demeanor with safe behavior after several interventions and processing with staff. Because of the lengths of intervention required for regulation/stabilization, provider placed resident on a 1:1 observation status. She was moved out to the comfort room for 72hrs on a 1:1 status and was given paper scrubs.
