Narrative:

The program manager and the licensing specialist completed a buildings and grounds walkthrough of the PRTF unit. All children's bedrooms, bathrooms, dayroom, and seclusion rooms were seen. All resident rooms were clean and tidy.

One area on the wall connecting to a bathroom inside resident's room 133 appeared to have old water damage from a previous leak. There was no standing water, and the area was not wet. Licensing felt the wall and it appeared to be solid under the damage. The facility reported they will have their maintenance remove the old, damaged drywall and patch the area. The facility reports they will send a picture of the completed repair.

MARs were reviewed for the following residents with no issues noted:
