Report Description: [REDACTED]

[REDACTED] Staff to client ratio was 5:5. This incident happened at the pediatric Americana building. Client reported he?s going to break the window in his room so that he can jump off the cliff to end it all. He then started exhibiting racing and unorganized thoughts laughing irrationally and talking about bloodborn pathogens getting injected in his body. Nursing received order to send to ER and police and ambulance transported him. I sent a staff with him while he?s at children?s. Children?s stated to me on the phone that they will not be able to find acute placement and that he will be sent back to us. [REDACTED] guardian notified of incident and got consent for further evaluation, assessment, and treatment.
