Report Description: Child's Name: [REDACTED]

[REDACTED] resident in parental custody) A peer approached a staff and informed them of the following incident: The peer left the bathroom of room 208 and this resident entered with an extra pair of jeans in hand. As the resident was attempting to close the bathroom door, the resident hung the bottom of the pants legs on the top of the door. The groin area of the pants were left hanging upside down and as the resident placed his head in the loop, attempting to hang himself from the pair of jeans. The door did not close completely and caught the attention of the peer, the peer opened the bathroom door completely and removed the pants from the peer and alerted staff outside the bedroom door. A supervisor and nurse went to the situation and observed the resident sitting on his bed. When nursing began asking the resident about this incident, the resident disclosed that his actions were to "End the pain" that he reports constantly feeling and that he was upset with peers that had been verbally bullying him all day. The resident was cooperative in removing all items from his bedroom and placing his mattress in the hallway for continuous observation. No ligature marks, redness or any injury noted on the resident's neck by nurse. Resident declined injury or pain to the area. Nursing completed C-SSRS, contacted provider on call, and resident placed on suicide precautions for twenty-four hours. Resident's personal belongings placed in the nurses station. Administrator on call, therapist on call and primary therapist notified via secure message @2035. Upon assessment today and after the resident spoke to the Therapist and physician it was decided to make a referral for [REDACTED]. He was accepted to [REDACTED] and will be transported tonight by our transportation team. Residents guardians have been notified of the transfer.
